**Alu S4 Eloxa** – Elegant and durable

Aluminium is known for its pleasant and comfortable wear benefit due to its lightweight but sturdy material. We now have the possibility to enhance these benefits with modern surfaces & printings, e.g., the aluminium silver-matt finish in combination with the digital sub-eloaxal printing.

The silky matt surface of anodised aluminium creates a very refined and premium quality effect. The use of the high h-precision micro-waterjet cutting technology enables the fine, smooth edges, which add the last touch and are also textile-friendly. The digital sub-eloaxal printing is perfect in terms of surface finish, durable, resistant to abrasion and non-reactive to chemicals.

### Product description

- Fine aluminium name badge with rounded corners
- Coloured backgrounds (except white) combined with:
  - only logo
  - logo and name, title etc.
- Scratch resistant sealed surface
- Lightweight and comfortable to wear
